Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Applicant and Applicant Representative discussed the invention and what they viewed as the novelty over the cited Roth patent. Upon further discussion, agreement was reached on a change to the language in steps a(ii and a(iii) of Claim 42 to clarify that the distributor has assigned a value to "each of at least some of the plurality of attributes" and "spreading the attributes of a preponderance of the responses". The Examiners agreed that these changes appear to overcome the cited prior art but that further review of it and further search for other prior art would be required..
